WHAT WE OFFER

We offer a comprehensive range of efficient and cost-effective pest control and pest management services to operators in all industry sectors. We work with a wide variety of premises owners, landlords, facilities managers, property managers and estate managers who all appreciate our fast, efficient, honest and flexible approach to protecting their property.

Pest Control Inspection Services

The starting point for any pest-related problem. Our qualified and expert surveyors will conduct a complete inspection of your premises to identify current problems, potential issues and appropriate solutions.

Pest Management Services

Pests are always looking for new habitats. Openings around pipes, holes in rooves and gaps under doors all offer invitations for pests to invade. Once our surveyor has identified problem areas in your premises we will install and maintain protective measures to ensure your business remains pest-free as part of an integrated pest management plan.

Infestation Removal

Should your business find it has a problem with rodents, cockroaches, pigeons, gulls, bed bugs, or a host of other pests, our experienced technicians will implement a fast, efficient and discreet solution that recognises the demands of your business and the need to conform to public health and other legislation.

Bird Control Services

Pigeons, gulls, parakeets and other flying pests are an increasing problem for businesses. Their mess can be a health hazard and will make your property look unsightly. We offer a range of effective solutions such as netting and spikes along with other types of bird deterrents. We also offer a natural bird control using our highly trained Harris Hawks. This solution is particularly effective in larger areas such as factories, sports stadia, industrial estates and housing developments.

Waste Management and Decontamination Services

We are a registered waste carrier and can assist with the removal of a range of contaminated materials – from rat debris to pigeon fouling. Whether you have an individual room or a multi-storey property, our team will tailor the exact services you need including disinfection and decontamination. All works are conducted in line with the Waste Disposal Regulations 1994.

This represents a small selection of the services we offer commercial and residential customers. We are always ready to discuss your individual pest management needs and offer free surveys and quotations.
